## ABVP urges administration for starting of Rutland water project

Port Blair, May 26: Since last several years, the general public is hearing about the underwater pipe line connection for transportation of fresh water from Rutland Island, but still no major steps has been taken by A&N Administration for completion of this project. Now the public wanted to know from the administration why the project has not been taken on priority basis. The Akhil Bharatiya Vidyarthi Parishad, Port Blair City unit has requested the Lt Governor for completing the long pending Rutland water pipeline project on a urgent basis. In a letter to the Lt Governor, Shri U Parthsarathi highlighted the water crisis issues. ABVP has requested all the citizens of Port Blair to minimize their water expenses. In this hard time, ABVP has also requested the student community to help the birds and stray animals by providing water pots and foods to stray animals. The water crisis is a example of administrative failure and unwillingness of the UT admn. to complete the project on time.

## CORON

Port Blair, May 26: With the ease in the lockdown norms, hundreds and thousands of workers are moving out daily from their homes to their workplaces. Most of these workers depend on the bus services to reach their workplaces. The STS which has been plying its buses in some of the selected routes in South Andaman is not able to cater to the increasing demand of the buses. Following social distancing norms, only one passenger is allowed to sit in one

seat. This has reduced the number of the buses and only one person can travel on bus. The STS is giving government services, due to which workers are given while boarding. According to reports, it is estimated that 5000 workers
